

## **New product solutions for the range of panic exit hardware according to DIN EN 179/1125**

One of the leading manufacturers of emergency exit door systems, WILKA Schließtechnik GmbH, presents new product solutions on the occasion of the fair "fensterbau frontale" in Nürnberg in the area of the norms DIN EN 179/1125.

The use in conformity with the norm is in the foreground of mechanical, mechatronical and electronic double knob cylinders for emergency exit door locks. The leaving of keys in the cylinder is also part of the patented product solution. WILKA will let slip this special equipment into the products for active door leaf per standard now although the new norm outline EN speaks 179/1125 of a recommendation.

In addition WILKA presents further intelligent solutions in the range of application engineering as well as modified cross bars and pushbars to the qualified audience.
